Stacked correctly?

Twisted correctly?

Millions upon millions of possibilities!

10 magnetic discs form one image.

Mix and twist the discs and off you go! How quickly can you put the image back together correctly? Each disc must be positioned at the right level and be twisted to the correct position. Only then will a cylindrical panorama image be achieved at the end! The best thing about it is that, once the PuzzleTower is finished, it doesn't get hidden away in its box. As a design object, it adorns the wall unit in the living room and can be played with over and over again. You can also play PuzzleTower against other puzzlers as well as against time. In this case, each player needs a tower of their own. What are you waiting for?!

Stacked correctly?

Twisted correctly?

Millions upon millions of possibilities!

10 magnetic discs form one Image!

Mix and twist the discs and off you go! How quickly can you put the image back together correctly? Each disc must be positioned at the right level and be twisted to the correct position. Only then will a cylindrical panorama image be achieved at the end! The best thing about it is that, once the PuzzleTower is finished, it doesn't get hidden away in its box. As a design object, it adorns the wall unit in the living room and can be played with over and over again. You can also play PuzzleTower against other puzzlers as well as against time. In this case, each player needs a tower of their own. What are you waiting for?!
